Re: Parkland Library Expansion and Renovations

Dear John,

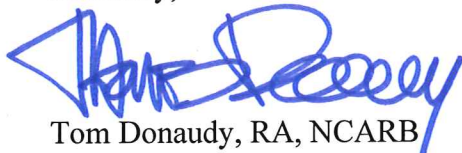

On behalf of Williamson Dacar Associates and staff, kindly accept this letter of recommendation for a project well done and a personal thank you to you John, your staff and your supportive subcontractors for the successful completion of the Parkland Library Expansion and the complete renovation of the Existing Library. Like most, this project had its challenges from working adjacent to the existing library facility, which remained open during construction, the coordination of parking with the existing City Hall, Fire Station and the Building Department as well as City events.

Our bi-weekly Owner, Architect/Engineer and Contractor site coordination meetings were productive, informative and further attributed to the timely resolution of issues the TEAM faced during construction. DiPompeo Construction worked extremely well with the Building Department, Public Works Staff and Library Staff to effectively construct the new Children's Wing, before phasing into the existing Library for its complete interior renovation and roof replacement. Your staff and subcontractors worked very well around many obstacles, which included; roof leaks on the existing building, eminent storms, power outages, transferring FPL service as well as enforcing traffic safety and public awareness.

Your team was professional, extremely knowledgeable, kept us in the loop at all times. The quality of work was excellent, and the project was finished within final budget and schedule.

We look forward to working with DiPompeo Construction Corp. and your staff on future projects and we wish you continued success.

Sincerely,

Tom Donaudy, RA, NCARB
